Revenue is only determined on the an arbitrary number. To receive this amount, the player is asked to make a choice between

Figure 10: *mean* function taking *data* as the first argument. It ignores the arguments to build the dataset for which the values in the statistical measures are built. Notice the number of arguments in the function is 11. The function is flexible enough to allow creating functions to handle the addition of the arguments and

Universities are subject to a range of external influences that may affect their operations. These include government policy, funding, and regulation, as well as the needs and expectations of the public and the private sector. Universities must therefore be able to adapt to these external influences in order to remain relevant and effective.
