

GeomObject

GeomObject

OscillatingWall

```
graph BT; OscillatingWall --> GeomObject_L[GeomObject]; OscillatingWall --> GeomObject_R[GeomObject];
```

The diagram illustrates a class hierarchy. At the bottom is a box labeled 'OscillatingWall'. Two lines extend upwards from the top of this box, branching out to two separate boxes above it, both labeled 'GeomObject'. This indicates that 'OscillatingWall' is the superclass, and the two 'GeomObject' boxes are its subclasses.
