

GeomObject

GeomObject

OscillatingWall

```
graph BT; OscillatingWall --> GeomObject1[GeomObject]; OscillatingWall --> GeomObject2[GeomObject];
```

The diagram illustrates a class hierarchy. At the bottom is a box labeled 'OscillatingWall'. Two lines extend upwards from its top edge, each ending in an arrowhead pointing to one of two boxes at the top, both labeled 'GeomObject'. This indicates that 'OscillatingWall' is the superclass, and the two 'GeomObject' boxes are its subclasses.
