

TetMeshBase

Mesh

oomph::GmshTetScaffoldMesh

```
classDiagram
    class oomph_GmshTetScaffoldMesh["oomph::GmshTetScaffoldMesh"]
    class TetMeshBase
    class Mesh
    oomph_GmshTetScaffoldMesh --|> TetMeshBase
    oomph_GmshTetScaffoldMesh --|> Mesh
```

The diagram illustrates a class hierarchy. At the bottom is a solid rectangular box labeled 'oomph::GmshTetScaffoldMesh'. Two vertical lines extend upwards from its top edge, each ending in an arrowhead pointing to the bottom edge of a dashed rectangular box above. This dashed box is divided into two sections: the left section is labeled 'TetMeshBase' and the right section is labeled 'Mesh'. The dashed lines represent abstract base classes, while the solid box represents a concrete derived class.
